TECHNOLOGY SERVICES

Technology Resources for At-Home-Learning Students & Parents

We have pulled together a list of resources that you may find useful as you prepare for At-Home-Learning.

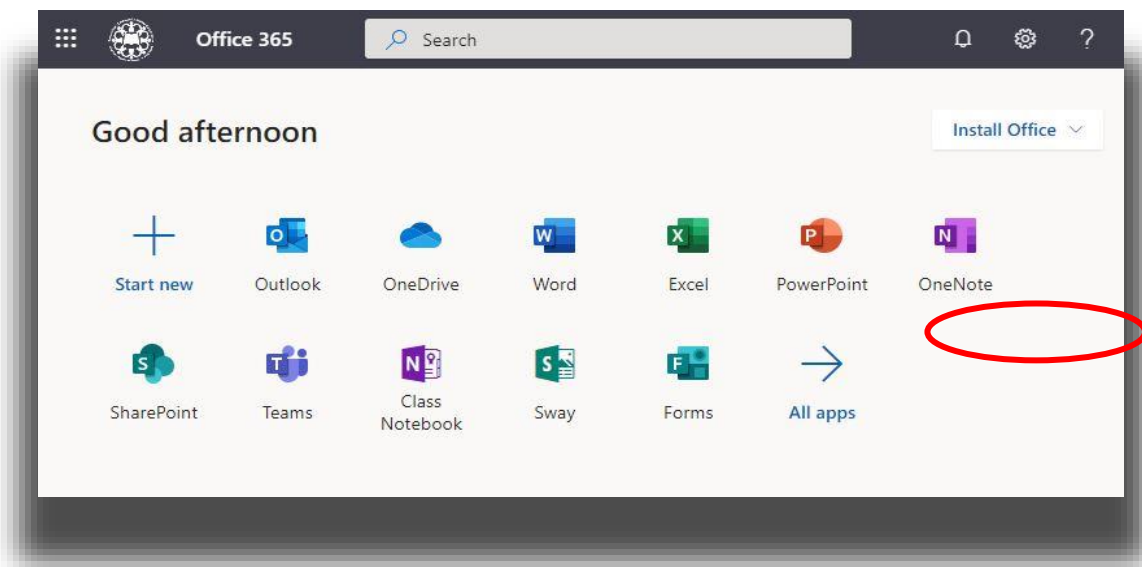

Email – <https://mail.office365.com>. Your login is - studentID@brownsburgstudents.com

[VDI – Access from Home](#)

BCSC students have the ability to access their network drives and work from home with VMWare. Click the link above for a printable tutorial.

[Office365 Login](#)

Use this link to login to Office365. From here, students can access their **OneDrive**, **e-mail**, and all of the Office applications. You can also download the Office applications onto a personal computer for free from this page.

[High School students using Schoology](#)

Remember to use our school link to access your classes: <https://brownsburg.schoology.com>

[Zoom](#)

A number of our teachers are using Zoom videoconferencing software to connect with students. Use this link if you would like instructions and/or more information about this free, optional tool.

[Remind](#)

Remind is a communication platform that makes it easier and safer for educators, students, parents, and guardians to work together. Many teachers and coaches have been using Remind for the sending of messages via SMS (text), in-app notifications, or email without sharing personal contact information. Teachers are **not** required to use Remind. It is an optional tool that is available to them for communication with students and parents outside of email or Schoology. If you would like directions to opt-in or opt-out of Remind messages, or assist your students in receiving these messages themselves, click the link above.
